LONGVIEW FIBRE COMPANY. LONGVIEW, WASHINGTON SEPTEMBER 20 1927

Longview Fibre commenced operations in Longview Washington in 1927 with a single paper board machine to produce paper products. We have grown to become an integrated nationally recognized wood, paper and packaging company.

Longview Fibre owns and manages approximately 585,000 acres of valuable timberlands in the Pacific Northwest. Based on our production capacity, we believe we are the largest producer of unbleached kraft paper in North America. We own and operate what we believe is one of the largest pulp and paper making complexes.

Longview Fibre operates a paper mill and a network of 15 converting plants in 12 states with approximately 3,200 employees. We produce value added micro flute through triple wall corrugated containers, specialty packaging and creative point of purchase displays.

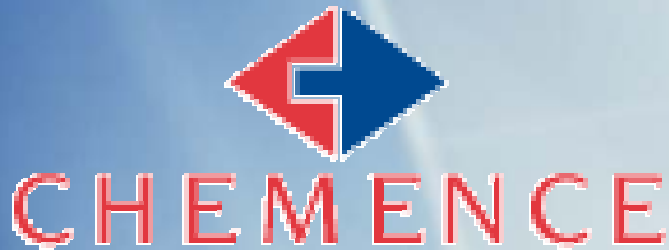

Longview Fibre facilities are capable of producing containers in virtually any size, type, color and design. We believe that we have developed a reputation for high quality products and services. Our state of the art equipment has proven to give us an advantage in the market.

- Longview Fibre, Spanish Fork facility / plate department maintains an ISO 9001:2000 Quality Management System.
- We are responsible for creating art and plates for the western division of Longview Fibre.
- We manage art for the western division plants.

Outsourced Projects:

- ❖ Four Color Process
- ❖ Larger than 30" X 40" plates

Suppliers are a vital part of our business.

Categories that we require from our suppliers are:

- ❖ Quality
- ❖ Service
- ❖ Competitive pricing

They must have a good research and development program to be a leader in the market place to be able to help us stay ahead in our market place.

We currently work with two great suppliers;

- ❖ Chemence Incorporated - plate room supplies
- ❖ Container Graphics Incorporated - outside printing plates and cutting dies.

MARKET CHANGES

The market is changing continually.

- ❖ Paper
- ❖ Printing
- ❖ Styles
- ❖ Lead Times

We have been able to change with the market. Customers are requiring smaller quantities and more point of purchase qualities, without wanting to pay additional expense for their packaging needs.

Longview Fibre produces a wide range of products.

- ❖ Direct print - one to six colors
- ❖ Pre-print

These packages range from small regular style cases to large triple wall containers.

Open face litho laminate are micro flute products that are converted in our state of the art specialty department. These products are used to package food, hardware, exercise equipment, automotive and point of purchase packaging.

Longview Fibre, Spanish Fork Graphics Department

Full service department which includes:

- ❖ Creative design team
- ❖ Full size mock ups and proofs
- ❖ Chemence liquid photopolymer plates
